

Series KB-SW Type D Slideway Wiper

Type	Protection	H	S	W	T	Length	Wiper Material
KB-SW-D-1	Spring steel	39	27	3	15	850 mm	NBR
KB-SW-D-2	Spring steel	39	27	3	15	850 mm	FPM
KB-SW-D-3	-	39	27	3	15	850 mm	NBR
KB-SW-D-4	-	39	27	3	15	850 mm	FPM

Moulded wipers Type D are the correct choice for applications in the cleaning of large steel plates, with surface inaccuracies. The flexible wiper lip compensates easily to this difficult application.

A lip preload of 4 mm can be attained, resulting in retaining a constant low surface contact friction area. As an added protection against hot chips, a high grade spring steel protection cover is vulcanised to the rubber lip system.

Elastomer compositions are NBR & FPM with a hardness of 75A. Standard colour is black. Additional hardness properties & colours are achievable by the uses of H-NBR.

KB-SW Wiper Type D-1 & D-3
with spring steel protection

Note: Material NBR (Nitrile Rubber)
types are normally in our stock

KB-SW-3 & D-4 Wiper Type
with no spring steel protect strip
