KB-SW-E-8	6 x 9	34	2	19.3	600 mm	FPM																				

Moulded wipers type E are primary used in the application of cleaning any slideway / guideway with steps, irregular or interrupted surfaces. A preload up to 3 mm can be achieved while maintaining constant low friction at the contact point. This unique wiper makes it suitable for applications such as compensating for inaccuracies between any cover parts such as machine doors as used on machine tools.

Type KB-SW-E (SWING LIP)

Our normal stock are NBR material wiper
